EXAMINER'S COMMENT

1. The drawings are objected to because of their informality, i.e. uneven lines, blurred lines, and smeared erasures. Note especially figure 3. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Daniel Kimbell on March 24, 2004.

The application has been amended as follows:

1. (Currently Amended) A knife sharpening system for sharpening blade edges of knives, comprising: a base portion having an elongated guide rail, a top surface at a first level, a knife support means for maintaining a blade of a knife being sharpened with its blade edge spaced apart by a horizontal distance from the guide rail and for elevating the blade on a plane at a second level which is higher than the top surface of the guide rail and a handle support for engaging a handle of the knife; and a sharpening implement which contacts and is guided on the guide rail for movement relative to the blade and which is longer than the distance between the guide rail and the blade edge.

Application/Control Number: 09/909,353

Art Unit: 3723

- 6. (Currently amended) A sharpening system for sharpening blade edges of knives comprising: a base portion having two elongate guide rails, each with a top surface at a first level, a knife support means for maintaining a blade of the knife being sharpened with its blade edge spaced apart by a horizontal distance from the guide rail and for elevating the blade on a plane at a second level which is higher than the top surface of the guide rail, and wherein the knife support means will support the knife in two, flipped over orientations; and a sharpening implement which contacts and is guided on the guide rail for movement relative to the blade and which is longer than the distance between the guide rail and the blade edge.
- 7. (Currently Amended) A knife sharpening system for sharpening blade edges of knives, comprising a base portion having an elongated guide rail with a top surface at a first level, wherein the guide rail is curved to match a curved knife which the knife sharpening system is used to sharpen, a knife support means for maintaining a blade of the knife being sharpened with its blade edge spaced apart by a horizontal distance from the guide rail and for elevating the blade on a plane at a second level which is higher than the top surface of the guide rail; and a sharpening implement which contacts and is guided on the guide rail for movement relative to the blade and which is longer than the distance between the guide rail and the blade edge.
- 10. (Currently Amended) A knife sharpening system for sharpening blade edges of knives, comprising: at least one knife having a predetermined handle and blade size, shape, and blade edge angle; a base portion having an elongate guide rail having a top surface at a first level, a knife support means for maintaining a blade of the knife being

sharpened with its blade edge spaced apart by a horizontal distance from the guide rail and for elevating the blade on a plane at a second level which is higher than the top surface of the guide rail and a handle support for engaging a handle of the knife; and a sharpening implement which contacts and is guided on the guide rail for movement relative to the blade and which is longer than the distance between the guide rail and the blade edge.
